

# Inline Dual Check Backflow Preventers/Device

# Meets requirements of ASSE 1024

## 711X and 7311X Series - Model Number Explanation

### SPACE 1, 2, & 3

Basic dual check valve model number:

711 = Inline dual check valve

Note: 7311 = Inline dual check valve - Integral meter swivel inlet with special lay length

## SPACE 4

X - Signifies reduced envelope dual check valve

#### SPACE 5

Dual check valve size:

3 = 3/4"

## SPACE 6

Inlet connection type:

- F Female iron pipe union
- J Meter swivel integral
- M Male iron pipe union

## SPACE 7

### Outlet connection type:

- E Female iron pipe integral
- F Female iron pipe union\*
- M Male iron pipe union\*
- \* Available only with meter swivel integral inlet

SPACE 8 Blank

## SPACE 9-10

The sizes for inlet (5) and

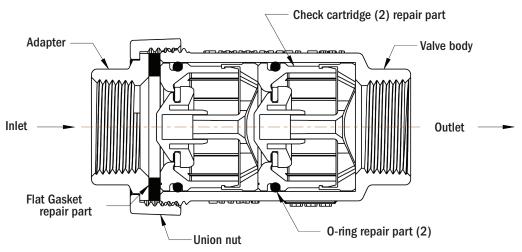

outlet (6) types of connections:

3 = 3/4" 4 = 1"

Thread size of meter threads

METER SIZE	THREAD SIZE	MODEL NO. DESIGNATION
5/8 x 3/4	1"	4
3/4	1"	4

## **COMPONENTS AND REPAIR PARTS**

Contact factory for Repair Parts.

# **HOW TO ORDER**

# Not all sizes or combinations available - contact factory.

**UNIT REQUIRED (Example):** 

- Inline style valve
- Inlet Meter swivel integral (3/4 meter)
- Valve size 3/4"
- Outlet FNPT union 3/4"

# Inline Dual Check Backflow Preventers/Device

- 1. Use only for residential and mobile home supply service or individual outlets.
- 2. The device can be installed in either a horizontal or vertical position.
- 3. The device shall be installed in an accessible location to facilitate the removal for servicing and testing.
- 4. Service lines should be thoroughly flushed before installing the device. Excessive pipe sealant or Teflon tape may foul checks. A suitable strainer should be installed upstream of the device.
- DO NOT use Vaseline<sup>®</sup>, plumber's grease, or any other petroleum based product on seals or O-rings.
- 6. Insure that device is installed in proper flow direction. Refer to flow direction arrow on device tag.
- 7. Do not over-tighten O-ring union nut seal or across body cylinder to avoid distortion.
- 8. Any sweat fittings must be completed before installing device.
- 9. A pressure relief valve or expansion tank is recommended downstream of device if thermal expansion conditions are possible.
- 10. Use only on cold water services. Protect from freezing.
- 11. Refer to pressure and temperature ratings on device tag.

## FIELD INSPECTION AND TEST PROCEDURE

### A. DIS-ASSEMBLY

- 1. Remove the device body from the line (union nut and adapter can remain in the line).
- 2. Remove the two check cartridges using care not to damage device components.
- 3. Visually inspect seals, sealing surfaces, etc. for debris or damage.

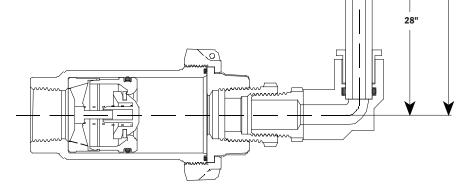

### **B. TESTING**

- 1. Check cartridge O-ring should be lightly lubricated with a NSF approved silicone lubricant.
- Insert check cartridge with 0-ring into A.Y. McDONALD test kit as shown in drawing. Cartridge should be pushed against shoulder.
- 3. Add water to test kit level to upper red line 42 inches (1.5 psig).
- 4. Observe water level for up to 5 minutes until water level stabilizes. Water level should not fall below lower red line 28 inches (1.0 psig).
- 5. If water column falls below 28 inches the check cartridge should be cleaned and re-tested or replaced.
- 6. Repeat steps B1 B4 for second check cartridge.

## C. RE-ASSEMBLY

- 1. Clean and inspect device components.
- 2. Check cartridge O-rings should be lightly lubricated with a NSF approved silicone lubricant.
- 3. Insert check cartridges into body correctly corresponding to flow direction on device tag.
- 4. Re-assemble device into line. Do not over-tighten.

WARNING: It is unlawful in CALIFORNIA & VERMONT (effective 1/1/2010); MARYLAND (effective 1/1/2012); LOUISIANA (effective 1/1/2013) and the UNITED STATES OF AMERICA (effective 1/4/2014) to use any product in the installation or repair of any public water system or any plumbing in a facility or system that provides water for human consumption if the wetted surface area of the product has a weighted average lead content greater than 0.25%. This prohibition does not extend to service saddles used in California, Louisiana or under USA Public 1 and 11.130
